With a 'B' and 'C' energy rating, you're looking at the most thermally efficient timber sash window system

THE WINDOW TO A GREENER WORLD

“The Ecotilt™ system has been developed to meet worldwide demands on eco efficiency. Our responsibilities within the window sector have now been widely acknowledged. With an Energy Rating of ‘B’ and ‘C’ Ecotilt™ is unmatched by any other timber sash system.”

Mike Derham Managing Director

We call it the responsible eco window system

What is an energy rating?

The BFRC Rating equation is based on 3 factors:

- Thermal Transmittance (U-value)
- Solar Factor (g-value)
- Air Leakage (L-value)

A BFRC Rating simply and effectively assesses the energy performance of the whole window.

This rating covers the frame material, the frame design, the glass type and all the other components that make up the window.

For the first time it is possible to compare the energy performances of different complete windows simply and quickly.

Ecotilt™ is the highest energy rated timber sash window system

The BFRC label

Energy labels can already be found on all types of household goods. The labels allow buyers to compare and select products based on their specific energy performance rather than on manufacturers claimed energy values.

Only window manufacturers who successfully complete the BFRC certification process are able to use the label.

The high ‘B’ and ‘C’ Rating of Ecotilt™ is an assurance to homeowners and specifiers who recognise the benefits of saving precious resources.

Energy Saving Recommended Mark

The Energy Saving Recommended logo has been developed by the Energy Saving Trust to distinguish the most energy efficient products on the market. Only products that meet the strict requirements are endorsed.

The Energy Saving Trust is an independent, non-profit making organisation backed by the Government. Its aim is to cut emissions of carbon dioxide - the main greenhouse gas causing climate change - by

promoting the sustainable and efficient use of energy.

Manufacturers that have earned the BFRC (British Fenestration Rating Council) ‘A’, ‘B’ or ‘C’ rating are eligible to apply to register their windows with the scheme and (subject to approval) to use the Energy Saving Registered logo with registered products.
